

Clay Oven Pizzeria

A small, family owned pizza restaurant that's looking to expand their online presence. The owners are looking to add their menu online and give customers the ability to order directly from the site. They'd also like to have a page dedicated to their monthly pizzas, which can be edited by staff to keep the monthly specials up to date. Besides that, they'd like the usual "About Us," page, contact information, and potentially even a page for people to submit work applications on for when they are hiring.

Pages

- Home
- Monthly Special
- Menu
- Order
- About Us / Contact Info
- Careers (Job Openings)
- Parties (Information on what specials they offer for party reservations)

Data

Customers will be able to login and order through the online menu. They have the ability to save certain orders for later, like a favorites section. Customers can also submit an application to work as long as they are logged in. Administrators must have the ability to edit the Monthly Special page and add to the page an image, title, and description. The previous month's pizzas must still be visible to showcase the variety at the restaurant.
